PRICE LIST OF NUT TREES, SEASON OF 1941-1942.

MOUNTAIN NUT COMPANY, 1420 WATTS AVE., ROANOKE, VA.

This list presents only a part of the nut tree varieties we are propagating. It does not include those of which we are already sold out or of which we have but a small number.

Crath and Broadview English walnuts, and our grafted black walnuts, should prove winter-hardy throughout the natural range of the American black walnut. The Northern Pecans are also hardy throughout the same range, but cannot be expected to mature their nuts in the more northern districts.

Chinese and Japanese chestnuts are growing and producing from Connecticut to Georgia. They are probably a little less hardy than the apple. Both are highly resistant to the chestnut blight. The Chinese nut is sweet as the American nut, and larger. The Japanese nut is still larger, but not so good in flavor.

With the exception of the Pecan, any of these nut trees may be expected to come into bearing as soon as apple trees.

A discount of 10% is allowed from the following prices on all orders amounting to ten dollars or more. All prices are F. O. B., Roanoke, Va. Shipment will be made by express unless otherwise specified.

GRAFTED CHINESE CHESTNUTS

Varieties, Carr and Hobson.
3 feet, up, \$2.00
Seedlings, 3 ft., up, 1.00
" 5 ft., up, 1.50
